

PROJECT DESIGN PHASE – II

Project Title: Containment Zone Alerting Application

Team ID: PNT2022TMID02606

 <p>SCENARIO</p> <p>Browsing, booking, attending, and rating a local city tour</p>	 <p>Entice</p> <p>How does someone initially become aware of this process?</p>	 <p>Enter</p> <p>What do people experience as they begin the process?</p>	 <p>Engage</p> <p>In the core moments in the process, what happens?</p>	 <p>Exit</p> <p>What do people typically experience as the process finishes?</p>	 <p>Extend</p> <p>What happens after the experience is over?</p>
 <p>Steps</p> <p>What does the person (or group) typically experience?</p>	<div>Need for containment zone alerting application</div> <div>Get preventive measures from the disease</div> <div>User search for containment zone alerting applications to protect themselves from the disease</div> <div>User wants to take preventive measures by not entering the containment zones</div>	<div>Creating account</div> <div>Login</div> <div>Permission</div> <div>The user enter the necessary details to create a account</div> <div>User who already created a account will log in into the application</div> <div>User enables location permission</div>	<div>Containment zones</div> <div>The user will see the containment zone via Maps</div> <div>Location tracking</div> <div>User will enable location tracking to prevent them from entering the containment zones</div>	<div>App runs in background</div> <div>The user will see that the application is running on background</div> <div>Notification alert</div> <div>The user will get a notification if they enter into a contaminated zone</div>	<div>Safe</div> <div>The user will feel safe</div> <div>No tension</div> <div>The user will not have any worries</div>
 <p>Interactions</p> <p>What interactions do they have at each step along the way?</p> <ul style="list-style-type: none">■ People: Who do they see or talk to?■ Places: Where are they?■ Things: What digital touchpoints or physical objects would they use?	<div>It will be useful at anytime and anywhere</div> <div>The user will see the application as a need to their daily life</div> <div>The GPS will be used constantly to get notified of entering the zones</div>	<div>Account information will be saved for future logins</div> <div>Turns on the GPS for continuous tracking</div> <div>The entering of details makes them feel safe because of the security measures used</div>	<div>Helps to travel in safer route</div> <div>Prevents from Diseases</div>	<div>The application help them by alerting Notification</div> <div>The GPS will be used constantly to get notified of entering the zones</div>	<div>The users location profiles are saved for future</div> <div>Get updates about the cases and other related things</div>
 <p>Goals & motivations</p> <p>At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")</p>	<div>Help me to get safety precautions</div> <div>Help me to avoid me from entering any contaminated zone</div>	<div>Help me to create a account</div> <div>Help me to have an application for my safety</div>	<div>Help me to track the location of myself and get alerted</div> <div>Help me to know about the cases in Current region</div>	<div>Helps me by not entering any zones</div> <div>Helps me by getting a notification when entering zones</div>	<div>Helps me by providing accurate information</div> <div>Helps me to track the zones I entered</div>
 <p>Positive moments</p> <p>What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?</p>	<div>Helps to take safe route</div>	<div>Excited to see how the application works</div>	<div>Shows containment zones</div> <div>Information is updated frequently</div>	<div>Notification alert system</div>	<div>Accuracy</div>
 <p>Negative moments</p> <p>What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?</p>	<div>The accuracy of the application due to user network</div>	<div>Security of the data entered in user side</div>	<div>There will be no proper updates if there is server error</div>	<div>Alert should be precise</div>	<div>Overlapping of 2 or more containment zones</div>
 <p>Areas of opportunity</p> <p>How might we make each step better? What ideas do we have? What have others suggested?</p>	<div>The radius of geofencing can be increased</div>	<div>Easy Login process</div>	<div>Showing nearby hospitals</div>	<div>Showing Assistance options</div>	<div>Alerting users through normal SMS in case of no Internet</div>
